Federal Communications Commission Office of Engineering and Technology Equipment Approval Services RE : Application for obtaining a transmitter approval Attached Application Form 731 FCC ID: LLB09002

Dear Sir or Madam:

Aclara RF Systems Formally Hexagram Inc. wishes to obtain approval for a telemetry transceiver with the FCC ID LLB09002.

The LLB09002 transceiver is used to transmit data from a utility meter to a data collection unit.

The LLB09002 Transceiver device is the 2-way communication device, which includes a Transmitter and a Receiver.

Complete information about LLB09002 device is documented in the attached application documentation including schematics and photographs. The LLB09002 transmitter was tested for conformance to the technical requirements of 90.201 Subpart I-General Technical Standards. Results of tests are attached to this application.

The LLB09002 was found to comply with all technical requirements of 90.201.

Sincerely,

Mark Wilbur
