RE: Application for obtaining a transmitter approval
Attached Application Form 731

FCC ID: LLB09002G

Dear Sir or Madam:

Aclara RF Systems, former Hexagram Inc. wishes to obtain approval for a telemetry transceiver with FCC ID LLB09002G.

The LLB09002G transceiver is used to transmit data from a utility meter to a data collection unit. The LLB09002G Transceiver device is the 2-way communication device, which includes a transmitter and a receiver.

Complete information about LLB09002G device is documented in the attached application documentation including schematic, bill of material, photographs, block diagram, user manual, operation description, The LLB09002G transmitter was tested for conformance to the technical requirements of 90.210. General Technical Standards. Results of tests are attached to this application.

The LLB09002G was found to comply with all technical requirements of 90.210.

Sincerely,

Xinhua Gan
RF Design Engineer
