RE: Application for obtaining a transmitter approval
Attached Application Form 731

FCC ID: LLB09010B1W

Dear Sir or Madam:

Aclara Technologies LLC wishes to obtain approval for a telemetry transceiver with FCC ID LLB09010B1W.

The LLB09010B1W transceiver is used to transmit data from a utility meter to a data collection unit. The LLB09010B1W Transceiver device is the 2-way communication device, which includes a transmitter and a receiver.

Complete information about LLB09010B1W device is documented in the attached application documentation including schematic, bill of material, photographs, block diagram, user manual, operation description, The LLB09010B1W transmitter was tested for conformance to the technical requirements of 90.201 Subpart I-General Technical Standards. Results of tests are attached to this application.

The LLB09010B1W was found to comply with all technical requirements of 90.210.

Sincerely,

Siva Jambulingam
Principal Engineer
