Equipment Approval Services  
RE : Application for obtaining a transmitter approval  
Attached Application Form 731  
FCC ID: LLB10000

Dear Sir or Madam:

Aclara RF Systems Formally Hexagram Inc. wishes to obtain approval for a telemetry transceiver with the FCC ID LLB10000.

The LLB10000 transceiver is used to transmit data from a utility meter to a data collection unit. The LLB10000 Transceiver device is the 2-way communication device, which includes a Transmitter and a Receiver.

Complete information about LLB10000 device is documented in the attached application documentation including schematics and photographs. The LLB10000 transmitter was tested for conformance to the technical requirements of 90.201 Subpart I-General Technical Standards. Results of tests are attached to this application.

The LLB10000 was found to comply with all technical requirements of 90.201.

Sincerely,

Siva Jambulingam  
Principal Engineer
