Field Calibration and Tune-Up Procedure  
FCC ID: LLB10000A

Hexagram's low power RF devices have passed through extensive testing and calibration procedures while in the factory. Therefore, no additional calibration, tuning, or adjustment is required in the field. Hexagram's low power RF devices are shipped to the customer in the sealed enclosures. Thus, no adjustments or tuning can be made in the field, without breaking the factory sealed enclosure.

Sincerely,  
Siva Jambulingam  
Principal Engineer
