RE: Application for obtaining a transmitter approval  
Attached Application Form 731

FCC ID: LLB11005S

Dear Sir or Madam:

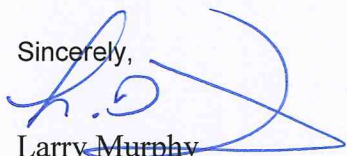

Aclara Technologies LLC, Former Hexagram Inc. wishes to obtain approval for a telemetry transceiver with FCC ID LLB11005S.

The LLB11005S transceiver is used to transmit data from a utility meter to a data collection unit. The LLB11005S Transceiver device is the 2-way communication device, which includes a transmitter and a receiver.

Complete information about LLB11005S device is documented in the attached application documentation including schematic, bill of material, photographs, block diagram, user manual, operation description, The LLB11005S transmitter was tested for conformance to the technical requirements of 90.201 Subpart I- General Technical Standards. Results of tests are attached to this application.

The LLB11005S was found to comply with all technical requirements of 90.210.

Sincerely,

Larry Murphy  
Executive Director of Engineering
