RE: Application for obtaining a transmitter approval
Attached Application Form 731

FCC ID: LLB11009X

Dear Sir or Madam:

Aclara RF Systems, Formerly Hexagram Inc. wishes to obtain approval for a telemetry transceiver with FCC ID LLB11009X.

The LLB11009X transceiver is used to transmit data from a utility meter to a data collection unit. The LLB11009X Transceiver device is the 2-way communication device, which includes a transmitter and a receiver.

Complete information about LLB11009X device is documented in the attached application documentation including schematic, bill of material, photographs, block diagram, user manual, operation description, The LLB11009X transmitter was tested for conformance to the technical requirements of 90.201 Subpart I- General Technical Standards. Results of tests are attached to this application.

The LLB11009X was found to comply with all technical requirements of 90.210.

Sincerely,

Siva Jambulingam
Principal Engineer
