Federal Communications Commission Office of Engineering and Technology Equipment Approval Services

RE : Application for obtaining a transmitter approval Attached Application Form 731 FCC ID: LLB11583

Dear Sir or Madam:

Hexagram Inc. wishes to obtain an approval for a telemetry transmitter with the FCC ID **LLB11583**. Previously, identically transmitters (LLB6327P, LLB6327PM, and LLB6327PMW) of Hexagram are approved by FCC.

The difference is in a new application: the enclosure, antenna, and circuitry are match to fit the direct mounting on a Sprague Gas Miter. Consequently, the PCB is redesign to fit new application.

Complete information about LLB11583 device is documented in the attached circuit schematics and photographs.

The LLB11583 transmitter was tested for conformance to the technical requirements of 90.201 Subpart I-General Technical Standards. Results of tests are attached to this application. The LLB11583 was found to be in conformance with all technical requirements of 90.201.

Sincerely,

Lazar Feldman Principal Engineer RF and microwave systems 216-896-8536 lfeldman@hexagram.com
