Accessories:

Audio Cable(Stereo)

Adaptor(6V 500mA) for Transmitter

Adaptor(15V 800mA) for Speaker

Connecting the System

I. Powering the Transmitter

Connect the small, round plug from the transmitter AC power adaptor to the transmitter power input jack and plug the other end of the adaptor into any standard 120V AC wall outlet.

Press the ON/OFF button of the transmitter. The Red LED on the power light should be ON.

II. Connecting to an Audio Source

Connect the audio cable to the LINE IN jack of the transmitter and plug the other end to audio source (e.g. LINE OUT of DVD player).

Turn the LINE IN selection switch to LINE IN.

The Audio/Video Switch is for latency select. Usually set at Audio for music listening.

III. Powering the Speakers

Insert the small, round plug from one speaker AC power adaptor into the speaker power input jack

Plug the other end of the speaker AC power adaptor into any standard 120V AC wall outlet.

Note: Be sure to use the speaker AC power adaptors rated 15V DC 800mA

1. After powering up the speaker, the power/RSSI indicator will start blinking in green color and searching for transmitter.
2. If transmitter is found and connected, the power/RSSI indicator will turn green.
3. For stereo operation, set the left/mono/right switch to “left” on the speaker located to the left of the listener, and set the other speaker to “right” position. Set each speaker to “mono” for mono operation.

IV. Audio Muting

When audio source is cut off for 3 minutes, the speaker will be muted. But if audio signal resumes, the muting will be disabled and speaker will be ON again.

V. Active/Passive Speakers

The 2.4GHz system can support infinite no. of receivers(speakers or headphones). However, the no of receivers increase, the performance will be downgraded, i.e. transmission range will be reduced.

The first two receivers paired with the transmitter are called “Active” speaker. The receivers paired later than the Active Speakers are called “Passive Speaker”. For multi-speakers system, the Active Speakers can maintain its performance and is independent with the no. of receivers in the system.

If one Active Speaker is powered off, the other Passive Speakers cannot be jumped into Active Mode automatically. It has to be powered off first and then power up again to make it “Active”.

Regulatory and Warning Information

Radio Frequency Interface Requirements

Tested To Comply With FCC Standards.
For Home Or Office Use.

Note: This equipment has been tested and found to comply with Part 15 of the FCC rules. Operation is subject to the condition that this device does not cause harmful interference. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the maintenance manual, may cause harmful interference to radio communications. There is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, the user is encouraged to consult the dealer or an experienced radio / TV technician for help.

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following 2 conditions: (1) this equipment may not cause harmful interference, and (2) this equipment must accept any interference received, including interference that may cause undesired operation. Any changes or modifications made without the approval by the party responsible for compliance could void the user's authority to operate this equipment.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications made by the user to this equipment. Such modifications could void the user's authority to operate the equipment.

RF Exposure Guidelines

The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

Nasaco NTID - 800

**TESTED TO COMPLY
WITH FCC STANDARDS**

FOR HOME OR OFFICE USE

FCC ID LLP-NTID800

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
