**Subject: Authority to Act as an Agent to FCC for a Class II Permissive Change Request**

**Applicant: Futurecom Systems Group**  
**Product: MOBEXCOM DVR Digital Vehicular Repeater**  
**Model: MOBEXCOM DVR 700**  
**FCC ID: LO6-DVRS700**

Dear Sir/Madam,

I hereby appoint UltraTech Engineering Labs Inc. (UltraTech) to act as my agent in preparation of this application to FCC for a Class II Permissive Change under FCC Rules.

A customer of Futurecom intends to use Mobexcom DVR 700 with a duplexer, a Motorola VHF XTL5000 Digital Mobile radio, a specific 05 Control Head and specific antennas as a package.

A Class II Permissive Change is required to certify minimum distances between the vehicle and bystanders with both the Mobexcom DVR 700 and the VHF XTL5000 mobile radio. MPE measurements were performed on the Mobexcom DVR 700 and the VHF mobile radio with antennas mounted on a car. It was determined that the combined Mobexcom DVR 700 and the mobile radio maximum power density is less than maximum allowed value.

The combined system and its control of both units (the DVR and the Mobile Radio) with the identified 05 Control Head have no effect on the RF performance or power out of the system.

The operation of the DVR System can be found on pages 6 through 8 of the draft Users Manual.

All hardware for this system complies with the requirements of 90.247 and it is the responsibility of the Licensee to comply to operational requirements of this section.

The MPE Report, revised User's Manual, MPE Test Configuration Block Diagram, and a Photo showing the system configuration are attached.

I also certify that the information provided, properly described the device or system for which Class II Permissive Change is required.

Regards,

Tony Bombera, P.Eng.
