1) Thanks for updated DVR-mobile configuration cross-reference listing ("8F083X03 Rev 4.21") - application makes more sense now. However the DVR-mobile configuration list seems confusing because it appears to mix 50% and 100% duty-factor powers, whereas "NOTE" declares mobile powers are 50% levels - please revise where appropriate to list all 50% or all 100%.

Refer to Tables 1, 2, 3 and the Note above Table 4A in the "Product Safety and RF Energy Exposure Booklet for Digital Vehicular Repeater Systems (DVRS) Rev. 4.21.1". Tx duty cycle clarifications were added to the above Tables and Note.
