RE: FCC ID: LOKJHJLBT05A00021_ATCB000871
Attention: Wayne Langston

I have a few comments on this Application.

1. FYI – The 731 says this is a TNF (held to the face). However, from our discussions it appears that this is an amplifier. This would be equipment code “AMP”. Please clarify.
2. Please provide the schematics for the device.
3. Please provide the manual of user information provided with the device. The user information should contain all of the rf exposure information and other cautions pertinent to this device.
4. Please provide a short operational description of the device. What is it, etc.
5. Please provide the test report for the device showing compliance to part 25 subparts C and D (as needed).
6. Please show photos of the internal components of the device. The photos provided only show the outside of certain parts of the device but do not show component layout or circuit boards.
7. Please provide MPE information for the device.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
