

MU-800-2 Mobile Unit Operational Description

The Mobile Unit (MU-800) is a portable monitoring device designed to be used by law enforcement officers in the field to detect the presence of subjects wearing ElmoTech transmitters. It has the capacity to recognize and monitor up to 200 Transmitters and log up to 3,000 time-stamped events.

The MU-800 is a battery-operated unit and comprises a 433.92MHz RF receiver.

The unit is powered by a 7.2V, Li ion battery and is charged by a 100-240VAC to 9VDC power adapter.

Operation with the AC/DC adaptor is for charging purposes only.
