

Important information when integrating the TOPAZ WiFi-Module into a host

1 Labeling Information for TOPAZ WiFi-Module for FCC

The TOPAZ WiFi-module has been labelled with a unique FCC ID number, and if the FCC ID is not visible when the module is installed inside another device, then the outside of the finished product into which the module is installed must also display a label referring to the enclosed module.

This exterior label can use wording as follows: Contains FCC ID: LSV-TOPAZ

As an alternative it is also allowed to show the wording shown above just on an e-label. In this case an instruction how to show the e-label has to be added to the user manual of the host.

2 Labeling Information for TOPAZ WiFi-Module for IC

The TOPAZ WiFi-module has been labelled with a unique IC ID number, and if the IC ID is not visible when the module is installed inside another device, then the outside of the finished product into which the module is installed must also display a label referring to the enclosed module.

This exterior label can use wording as follows: Contains IC ID: 20894-TOPAZ

As an alternative it is also allowed to show the wording shown above just on an e-label. In this case an instruction how to show the e-label has to be added to the user manual of the host.
