Subject: RE: New Application FCC ID: LU9247821 -MGA Entertainment (HK) Ltd.
Kitty and Alice, the administrative review of MGA Entertainment FCC ID: LU9247821 has been completed with no additional issues. However, we have reviewed the Technical Content of the application for MGA Entertainment and require the following items to be resolved before we can complete the application process:

1) Please indicate if the device was tested in 3 orthogonal axis (X Y & Z), and that the antenna was raised and lowered between 1 and 4 meters to determine worst case emissions.

2) please indicate the test procedure for making the measurements (was it ANSI C63.4:1992)?

We will continue processing this application once we receive the information.

Best regards,

Chris Harvey
