RE: Socket Communications

FCC ID: LUBBTM-4

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Are you intending to apply for Canada certification at the same time as FCC? I see Canada test reports were uploaded, but no Canada application forms. If Canada is desired, kindly complete an application form.
- 2.) Always supply both Internal and External photographs. I do note that External photos of the Bluetooth daughterboard fastened to the test fixture were provided. But FCC rules still require all views. May I suggest providing just photographs of the Bluetooth module without the test fixture? You could provide front and back views of the complete assembly for External photos, and addition photos with the RF shield removed for Internal photos..
- 3.) Please provide an actual label and location for this device. The view you submitted appears to point to the back of the Test Fixture, and not to the device itself. Also, because of the very small size of this device, I suspect this is not the precise label which will be placed on the product. Please review and confirm if the labeling is accurate.
- 4.) It appears that you wish to submit this as an unlimited Modular Approval. If so, then a Modular Request letter must be submitted addressing all eight points of DA 00-1407. Please review.
- 5.) The Manual appears to lack the required statements of 15.21.
- 6.) Since this is a relatively high power Bluetooth device, installation in situations where the device or it's antennas are closer than 20cm to the body may require SAR testing. It would be prudent to include warnings to the OEM integrator that if this does occur, SAR testing may be required.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
