Re: Request for confidentiality
Applicant: Rosemount, Inc.
FCC ID: LW2-77558

To whom it may concern,

Permanent Confidentiality

Request is hereby submitted by Rosemount, Inc. to withhold permanently from public review certain portions of the application for equipment certification for the referenced FCC identifiers. This request for confidentiality is made pursuant to 47 CFR 0.457(d) and 0.459 of the FCC Rules. In particular, the following sections of the application are to be kept permanently confidential:

- **Schematics**
- **Detailed Block Diagrams**
- **Detailed Operational Description**
- **Bill of Materials/Parts List**
- **Internal Photos only**

This device is a non-consumer device inaccessible to general public and is only accessible by qualified technical personnel in the industrial control industry. This device's internal components are not accessible to users and are coated with potting or epoxy. The 775 contains two boards, a digital board, which contains the radio, and a regulator board. The digital and regulator boards are completely encased in potting, and no components are accessible or visible to a user.

Rationale for request for confidentiality:

Rosemount Inc. has invested considerable time and materials in research and development to produce the referenced product. Disclosure of the permanently confidential portions of this application to competitors would not only give them significant competitive advantages in developing similar products, but would also disclose successful implementation of unpublished, leading-edge technology developed by Rosemount.

Sincerely,

Elizabeth Reierson
Principal Quality Engineer
Rosemount Inc.
