**Subject: IC Family Certification 1747A-QK**

We are requesting family certification for the model numbers listed below of intentional radiators (i.e. transmitters). All models share a common printed circuit board with identical components. The differences are the number of buttons and an optional proximity tag.

Models:

QK-1	One Button Transmitter
QK-2	Two Button Transmitter
QK-4	Four Button Transmitter
QK-1P	One Button Transmitter with Proximity Tag
QK-2P	Two Button Transmitter with Proximity Tag
QK-4P	Four Button Transmitter with Proximity Tag

The Transmitters are designed to function with the receiver models listed below. The QK-CAL model is the fully populated version. The QK-RUL has fewer relays/terminal blocks and has the optional RS485 transceiver/EEPROM components not installed.

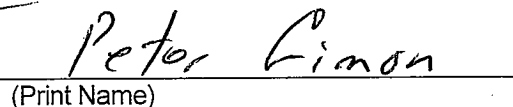

Models:

QK-CAL	Fully populated model
QK-RUL	Standard model (reduce features compared to CAL).
