Date: July 12, 2004

Federal Communications Commission
Authorization and Evaluation Division
Equipment Authorization Branch
7435 Oakland Mills Road
Columbia, MD 21046

To whom it may concern:

We, the undersigned, wish to identify the usage of the DENSO Access Point ("AP") to aid in the FCC certification process. The usage is associated with FCC ID LXC-AR5BAP-00048.

We, the undersigned, hereby identify that a limited number of APs will be supplied to and used by automotive radio professionals for experimental vehicle tests. The automotive professionals are cognizant of RF operation, antenna installation, and wireless testing, particularly in vehicular environments. In addition, some AP tests may be performed in corporate office environments. The AP is not intended for residential use.

The AP will be operated over-the-air in the 802.11a mode in the frequency bands from 5.25 GHz to 5.35 GHz, and 5.725 GHz to 5.85 GHz. Operation in other modes and frequency bands associated with 802.11b, 802.11g and turbo modes will be disabled. In addition, all operation will be disabled in the lowest UNII band, from 5.15GHz to 5.25GHz.

Sincerely Yours,

Roger Berg
Vice President
