Telephone	+49 (721) 595-1874
E-mail	anabel.pedraza-ferrer@siemens.com
Our reference Date	Certification WLAN March 4, 2009

Dear Sirs,

Hereby Siemens AG declares that:

Our Access Points, with FCC ID: LYHMPC11V2 and with FCC ID: LYHLAP-V1, require professional installation, as explained in the supplied user manual.

For the installation process, the professional installer will be provided with an administrator password. Only with this password it would be possible to change the device configuration and only the professional installer is authorized to perform this operation. By default, the WLAN interface is disabled.

When configured to perform automatic channel selection the Access Point will ensure uniform spreading by implementing a routine at startup and restart where the initial channel of operation is chosen randomly among the channels with least interference. This will ensure that the Access Point will utilize all available channels in the 5 GHz band.

Alternatively, a professional installer can manually set an initial channel of operation and thus has to ensure uniform channel utilization across all Access Points in a large deployment.
