**Ref: Updates for DFS Test Reports**

Dear Examiner,

attached we send you updates for the following Class II permissive change DFS test reports:

08U12032-12A for FCC-ID LYHMPCI1V2 (Model Numbers: W786-1PRO, W786-2PRO, W786-3PRO)  
08U12032-11A for FCC-ID LYHMPCI1V2 (Models Numbers:RAP-W1-RJ-E1, RAP-W2-R2-E2)  
08U12032-10A for FCC-ID LYHLAP-V1 (Model Number: LAP-W1-RJ-E1)  
08U12032-13A for FCC-ID LYHMPCI1V2 (Model Number: AP2650, AP 2660)

Changes were made in Clause 5 and Clause 6.1.4 to document the minimum antenna assembly gain as 5 dBi instead of 0 dBi. The reason for the change is, that the gain of the RCoax antenna is significantly lower than the 0 dBi which are stated in the data sheet. As a consequence of that we prohibit the use of the RCoax antenna in DFS channels and will describe this in the user manual. For this reason the allowed antenna with minimum gain is 5 dBi. For all named model names we guarantee professional installation.

If you have any questions, please feel free to contact us.
