REQUEST FOR CONFIDENTIALITY

Pursuant to FCC 47 CRF 0.457(d) and 0.459 and IC RSP-100, Section 10, Continental requests that a part of the subject application be held confidential. Continental has spent substantial effort in developing this product and it is one of the first of its kind in industry. Having the subject information easily available to "competition" would negate the advantage they have achieved by developing this product. Not protecting the details of the design will result in financial hardship.

1. Block Diagram includes internal oscillator frequency information that the manufacturer			
considers to be proprietary. Part of the Description of Operation exhibit contains			
manufacturer proprietary information relating to device encodings.			
2. DUT is FULLY potted using a non-removable epoxy based material. Removal of			
potting material causes irreparable damage to internal circuitry. Photograph exhibits
