RE: Explanation of BTT2 Model Similarities

Model numbers covered by this letter:

Brand	Model Number
Hunter	BTT-200, BTT-201

BTT-200 is identical to BTT-201 except for the thread type employed, as shown in the table below.

Model	Thread Type
BTT-200	NPT
BTT-201	BSP

As products are identical in every other way, all testing un-related to the thread type conducted on one model is representative of the other.

Please contact me with any questions.

Best Regards

Satoshi Kuwahara, Director Product Integrity
