RE: FCC ID: M4B6180010
Attention: Yoshiko Mizuta

I have a few comments on this Application.

1. Please note that neither the label nor the manual contain the 2-condition statement required by Part 15. Please provide a label showing the 2 condition statement as required by 15.19.
2. Please note that the device photos show an rf connector for use with an external antenna. The schematics show this as well. Is this connector a test port or is this connector for the intent of connecting to an external antenna for normal use? The block diagram explanation does not provide information on this connector. Please explain.
3. FYI – no action needed. Please note that the proper equipment code for this type device is DTS not DSS.
4. Please provide the required power drift information on all Device SAR measurement plots.
