RE: FCC ID: M4Y-0XG650\_ATCB001050

Attention: Elton Chen

I have a few comments on this Application.

1. Please note that the manual provided states that this device can fit into a PCMCIA slot. Also, please note that page 5 of the manual shows either a PCMCIA card or a PCMCIA card adapter. Either one is not correct. Please note that if this device is used or sold to the general public so as to be able to be placed into a PCMCIA to mini-PCI adapter, then you must perform SAR on three laptops (this device is over 200mW). Please note that as is represented in the test report, request for modular approval and other documentation, this device must be installed only by the OEM or integrator into a mobile device only. It cannot be installed by nor provided to the end user. Please provide an appropriate OEM installation manual for this device for mobile ONLY configurations with all of the applicable FCC statements and warnings.
2. Please note that this is a mobile only device. The antenna cable shown in the external photos does not appear long enough to provide 20cm separation. Please explain how the 20cm separation is to be maintained. Alternately, please test the device using a cable of sufficient length for 20cm.
3. Please note that the 2-condition statement on the label is unreadable. Please provide a label sample that is clear and legible.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
