Dear Bill,  
My client want full modular approval,  
I forgot this message in last E-mail.  
Thanks & Regards.  
JT Chen

JT,

OK, I will buy off on the justification for using this device in an embedded system. Now lets tackle the modular approval.

- 1.) If you want full modular approval, then you will have to supply test photos with the PCMCIA card external to the EUT.
- 2.) If you want limited modular approval then you will need to define the embedded systems this will work with by manufacturer and model number.
- 3.) In either of the above cases, you will need to supply a letter showing how this device complies with the modular approval requirements. See attached document beginning on page 2.

Bill
