TO WHOM IT MAY CONCERN

The T15 Multi Tech Reader with model number C300480, a dual mode transmitter operating on 125 kHz and 13.56 MHz was tested at EMC Technologies (NZ) Ltd. with results summarized in FCC test report number 160108.1.

This FCC test report also covers the T15 Mifare Reader that comes in 4 variants, i.e. C300470, C300471, C305470 and C305471 which operate on 13.56 MHz only, as the dual mode was determined to be a worst case version based upon the test results in the FCC report. The T15 Mifare Reader uses identical PCB with T15 Multi Tech Reader with fewer components on T15 Mifare Reader. Both have identical functional capabilities using 13.56 MHz transmitter and antenna characteristics. They also have identical enclosures.

Sincerely,

A handwritten signature in blue ink that reads "Menardo B. Lazaro".
