This item applies to both FCC and ISED I noted the open source software license in the installation manual. Please clarify whether controls of the radio are accessible via third party software. Please clarify points provided within KDB 594280 D01 configuration control sections I, III and VI (according to section VII). Link provided below. See also RSS-GEN 6.4	The open source software license in the manual refers to the Linux 3rd party statement. The 3rd party SW (Linux) is running on a different CPU to that which controls the RF transmitter. There is **no** interface that allows the RF to be changed.	ML & KG/ 7/27/2021
