Columbia, MD 21046

To whom it may concern:

Gallagher Group Ltd, hereby requests a Permissive Change Class II of the radio equipment certification for the Controller BR Series Reader certification number, FCC ID: M5VG031404. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. – There are no changes on the RF circuitry or chassis.
- (b) Functional capabilities. – There are no changes on functional capabilities of the product.
- (c) Antenna Characteristics. – There is a new antenna to be added to the previously certified product.
- (d) Cosmetic differences – There are no changes on the physical appearance of previously certified transmitter device.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

Menardo Lazaro
Compliance Engineer
