Dear Mike,

Please find below for our explanation:

Question #1: There is no RF exposure information in the user manual. Suggest wordings may be " IMPORTANT NOTE: To comply with the FCC RF exposure compliance requirements, no change to the antenna or the device is permitted. Any change to the antenna or the device could result in the device exceeding the RF exposure requirements and void user's authority to operate this device."

ANS.: Attached please find the additional information for RF safety, this will will place in the user's manual.

Question #2: Please justify the Emission designator 118KF3E by using Carson Rules(2M+2DK).

ANS.: Sorry for our omissions, the Emission Designator is $2M+2D= 2*(20\text{kHz}) + 2*(40\text{ kHz}) =120\text{ kHz}$. So, it should be 120kF3E.

Question #3: The operating frequency range has different number throught out the test report. In accordance with Tune-Up procedure, it listed 604-806MHz, Page 1, section 1.1 listed as 604- 806MHz but section 1.2 listed as 614-806MHz. Operating Description listed as 614-806MHz. Please confirm the operating frequency and make necessary correction on related documents.

ANS.: Sorry for our omission. Attached please find corrected page.

If you have any further questions, please kindly infrom me.

Regards,

K. C. Chen
ETC/EMC Deaprtment II
