Barry,

I spoke with Don Bush of dBi Corp this morning to confirm that the cable used was a two conductor non-shielded cable of 1 meter length. You may communicate directly with Don Bush on this subject if you need.

Thanks,

John

Subject: FCC ID: M5ZWOWANA

John,

I have only one issue with this application.

I have noted from the test setup photo the product was tested in accordance with the FCC rules with the cable and external sensor. Please can you state the length of the cable and whether it was shielded. If the cable length is less than 1 meter please justify the reason for this length.

Best regards
