

General Description

The Model PD115977 and PD115978 baby monitor Nursery Units are 915MHz digital modulation FSK audio transmitters. They are designed to pick up audio in the baby's room and transmit it to a receiver Parent Unit. The Nursery Units operate with 3-AAA batteries or Graco-supplied 120VAC adapter (Graco model U060020D12 AC Adaptor). Once the Nursery Unit is turned on, it transmits audio continuously.

The Model PD115978 Nursery Unit has an additional switch for a "Parent Finder" feature, which transmits a command to the Parent Unit. The units are otherwise identical.

Transmit Frequencies (Channels)

The Nursery Unit has six channels which are selected by pressing the button marked "ch". The Nursery Unit continues to transmit on the selected channel until another is selected by the user. The channels are:

Channel	Frequency (MHz)
0	905.000
1	908.999
2	912.998
3	916.997
4	920.996
5	924.995

Antenna

The antenna is internal and permanently attached.
