

General Description

The Model A5798 baby monitor Nursery Unit is a 915MHz digital modulation FSK audio transmitter. It is designed to pick up audio in the baby's room and transmit it to a receiver Parent Unit. The Nursery Unit operates with 3-AAA batteries or Graco-supplied 120VAC adapter (Graco model U060020D12 AC Adaptor). Once the Nursery Unit is turned on, it transmits audio continuously.

Transmit Frequencies (Channels)

The Nursery Unit has six channels which are selected by pressing the button marked "ch". The Nursery Unit continues to transmit on the selected channel until another is selected by the user. The channels are:

Channel	Frequency (MHz)
0	909.524
1	911.572
2	913.620
3	915.668
4	917.716
5	919.764

Antenna

The antenna is internal and permanently attached.
