RE: FHSS Statement FOR P011 FCC ID# M72:P011

To Whom It May Concern:

The P011 device complies with all of the regulations in part 15.247 should the transmitter be presented with a continuous data (or information) stream. If/when the system employs short transmission bursts, it complies with the definition of a frequency hopping system and distributes its transmissions over the minimum number of hopping channels specified in this section.

This device incorporates intelligence within a frequency hopping spread spectrum system that permits the system to recognize other users within the spectrum band so that it individually and independently chooses and adapts its hopsets to avoid hopping on occupied channels. This device does not coordinate frequency hopping systems in any other manner for the express purpose of avoiding the simultaneous occupancy of individual hopping frequencies by multiple transmitters

Please contact me if there is any information you may need.

Sincerely,

A handwritten signature in blue ink is written over a red Polycom logo. The signature appears to be "Yuk Wan".
