Dear Sirs:

Please find attached below a summary compilation of the highest radiated spurious emissions in response to Issue 5 on the ATCB comments to the certification submission for FCC ID: M72BTMOD01.

Hyper Corporation attests that the transmitter testing that was performed at the low, middle, and high channels for testing emissions from the device. Emissions were maximized at each channel following the procedures in ANSI C63.4.

In addition, Hyper attests that all configurations meet the limits.

The following table reports the highest emissions measured from the device.

Radiated Emission Summary (Highest Reported Emissions) for FCC ID: M72BTMOD01
