

FCC ID: M82-DMSSA47

According to 447498 D04 Interim General RF Exposure Guidance v01 section 2.1.2, the available maximum time-average power not exceeding 1 mW is exempt from the test.

The NFC Max. Peak power is 68.14 dBuV/m at 3m  
EIRP = -27.09 dBm = 0.00195 mW < 1mW  
ERP = -29.24 dBm = 0.00119 mW < 1mW

The ERP and EIRP power of NFC does not exceed 1mW, therefore SAR is exempt from testing.

**Note:**

1. The power referred the Peak power of the test report **T210113D03-RP6** for SAR test exclusion purpose.
