Subject: Advantech Co. Ltd. , FCC ID: M82-DVS-350, Assessment NO.: AN06T6005, Notice#1

Question #1: The block diagram and schematic diagram provided in the filing are for the system, please submit the block diagram and schematic diagram for the module.

Ans: The Applicant requests confidential. Thank you.

Question #2: The antenna specification show peak gain 2.0dBi (max.) - see page 3. Although page 20 shows 1.28dBi peak gain, please explain why MPE calculation was not based on 2.0 dBi antenna gain.

Ans: Because peak gain is the typical gain, MPE calculation was based on 1.28 dBi antenna gain.

Question #3: Test report section 2 has inapplicable model discrepancy description. You may need to remove it.

Ans: We revised remove the model discrepancy description on page 4, please see the revised test report.

Question #4: The user manual does not contain user information as specified in FCC 15. 21. Please revise the user manual.

Ans: We added the warning statement (FCC 15.21) into the user manual on p159.

Best Regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
