(2) log in to the ESL platform	8
(3) add new AP	8
(4) activate the new AP	10
4. Import Product Information	12
(1) download product information template	12
(2) fill in the product information table	13
(3) import the product information table	15
5.Binding ESL With Product	16
(1) creat new account	16
(2) bind the account with PDA	17
6. Modifying product information	20
(1) modify product information	20
(2) import the product information table	21

1. Product introduction

(1) Software System :

Check the state of hardware and software, manage and refresh ESL.

(2) AP

AP works together with ESLs and transmits data.

PoE Power Supply: Provide power to the AP and connect to the external network, having PoE port connecting with AP and LAN ports connecting to the external network.

(3) PDA

Binding the product with ESLs.

(4)电子价签

ESL works around AP.

2. Merchant- Store and Account

(1) Add merchant and get merchant account in the ESL platform

Please provide your company's business license to the sales staff for record. After confirming the complete information, our company will add the merchant for your company, as well as the merchant administrator's account and password. The sales staff will forward the account and password of the merchant administrator to your company.

(2) Log in ESL platform

Copy <http://47.52.135.163:8888/#/> to a browser and open it, enter merchant administrator user name and password.

(3) Add new store

Remarks: multiple stores can be built under one merchant's account. Base stations, ESLs, PDAs, products and templates are all associated with the stores.

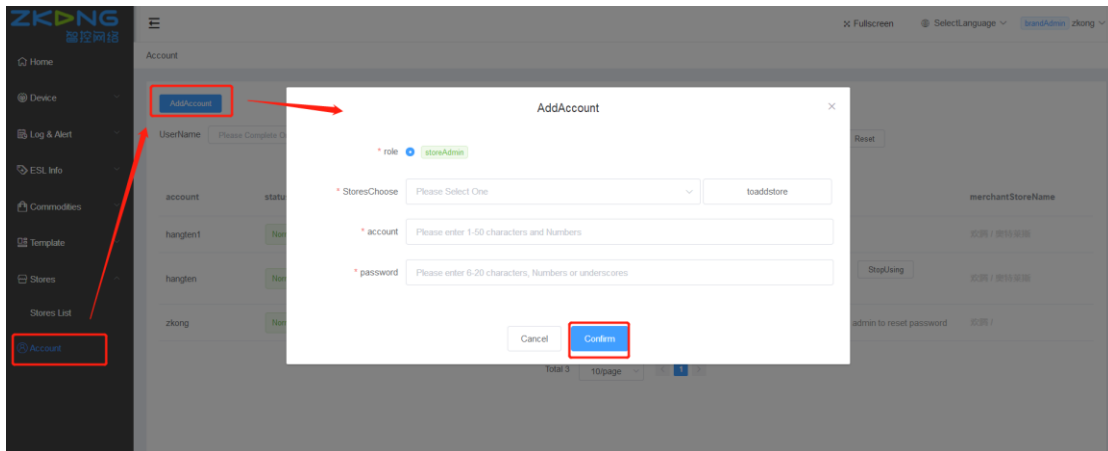

- 1、 After logging in the system, click "stores" - "stores list" - "add store" .
- 2、 Enter the store name and click "confirm" .

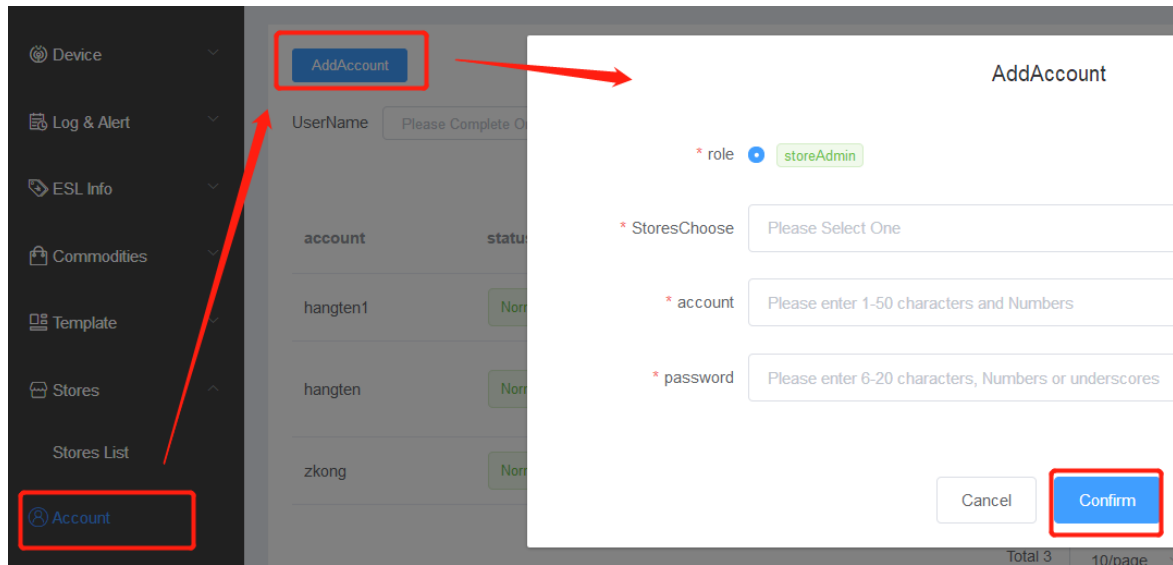

(4)Add new store manager account

1. Click "account " - "add account";
2. Select the new store;
3. Fill in the user name and password;
4. Click “Confirm” to complete it;

(5) Added/Edited Template classification and Template Type.

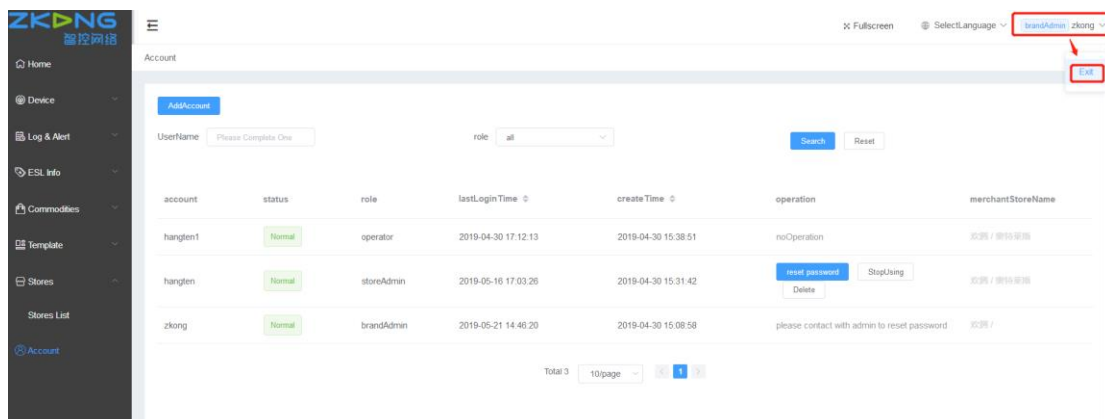

Template classification and template type are the identification fields of commodity matching templates. It's used in both commodity and template modules, so you need to set it up in advance.

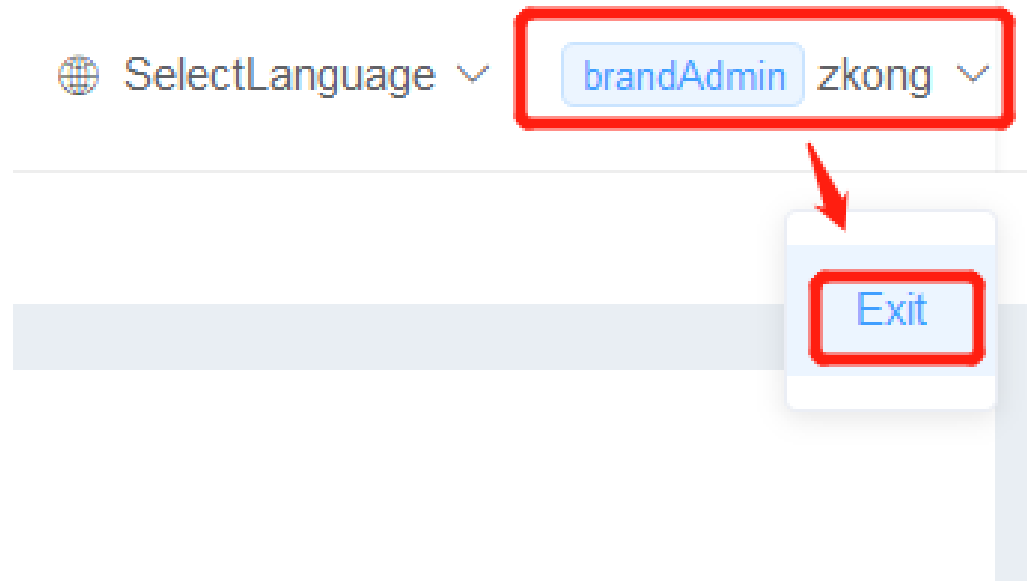

(6) Add merchant template

Store template module, can be imported into the business template. Templates created in the business template module, all stores can be copied to stores, reuse, saving time for each store to make its own template.

(7) Login with the store manager's account

1. Click the login account in the upper right corner and log out. Log out your current login account.
2. Login with the new store manager's account and password.

5. Connect base station

1. Take out PoE power injector, plug in inset socket, and connect PoE port of PoE injector to base station(white cable connection).

2. The LAN port of the PoE injector is connected to the router, as shown in the figure below
Remarks: the router's address is allocated automatically.

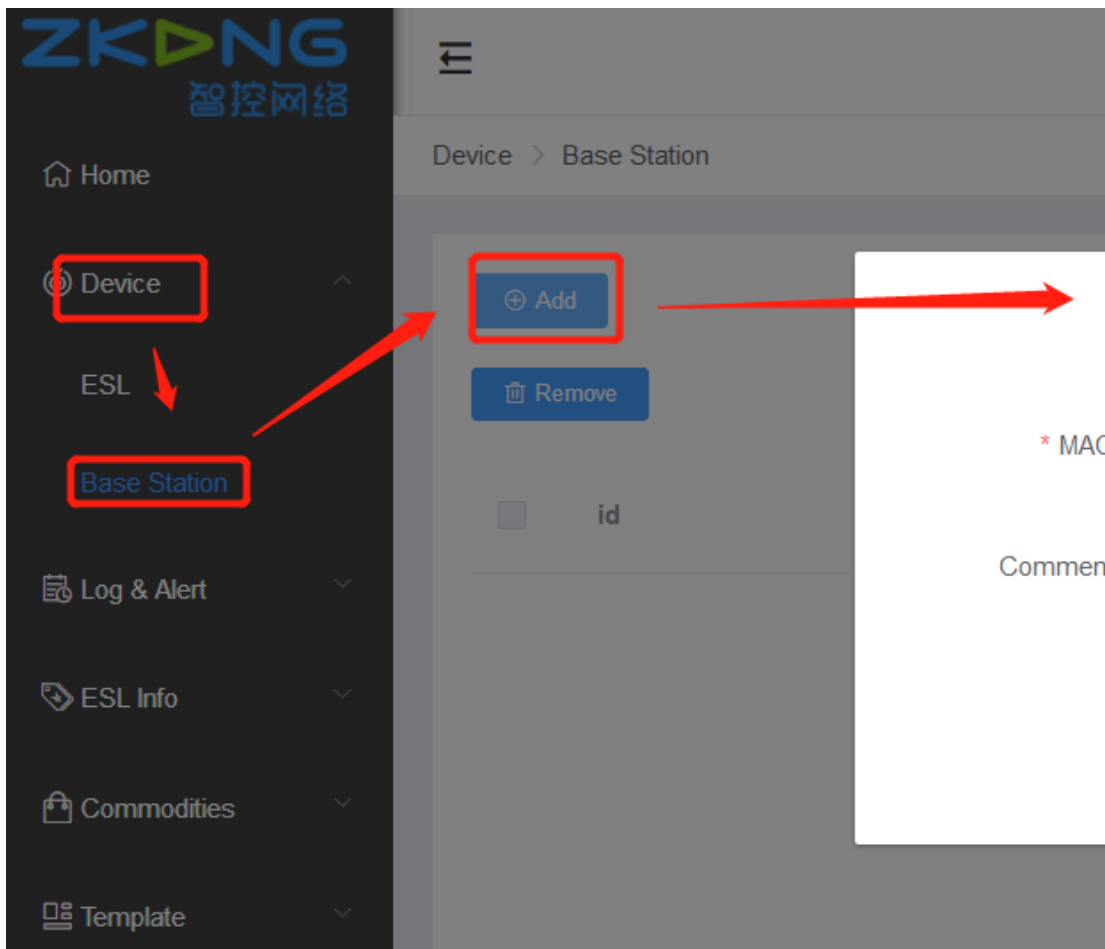

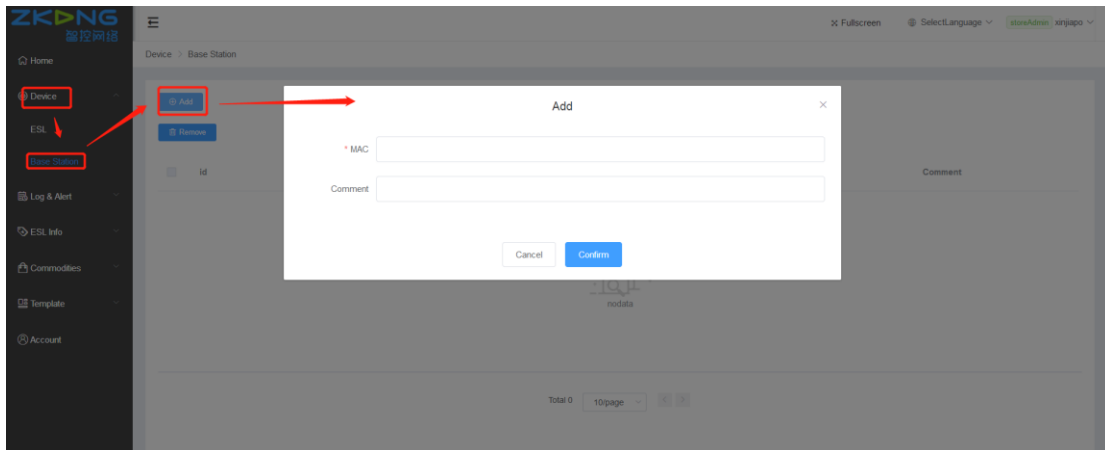

3. Activate ESL

ESL will be placed around the online AP (within a radius of 15m) and will be activated automatically in 10 minutes.

6.Add AP

After logging in, enter the system, click "device" -- "base station " -- "add", and pop up the window "Add".

Example as follows:

Device MAC: There is a device MAC on the back of the base station. Please fill in the MAC address in the red box as below. The MAC address A0A3xx,(0 is zero, not the letter O).

N+Cloud-DB 双频11ac吸顶AP

电源额定值:  48V; 0.2A POE

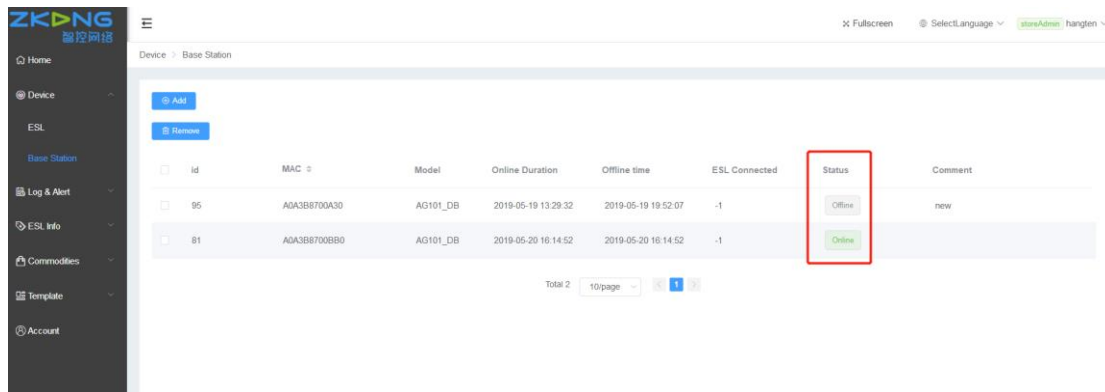

S/N: 
61AP000218900059

MAC: 
A0A3B87003A0

中国制造

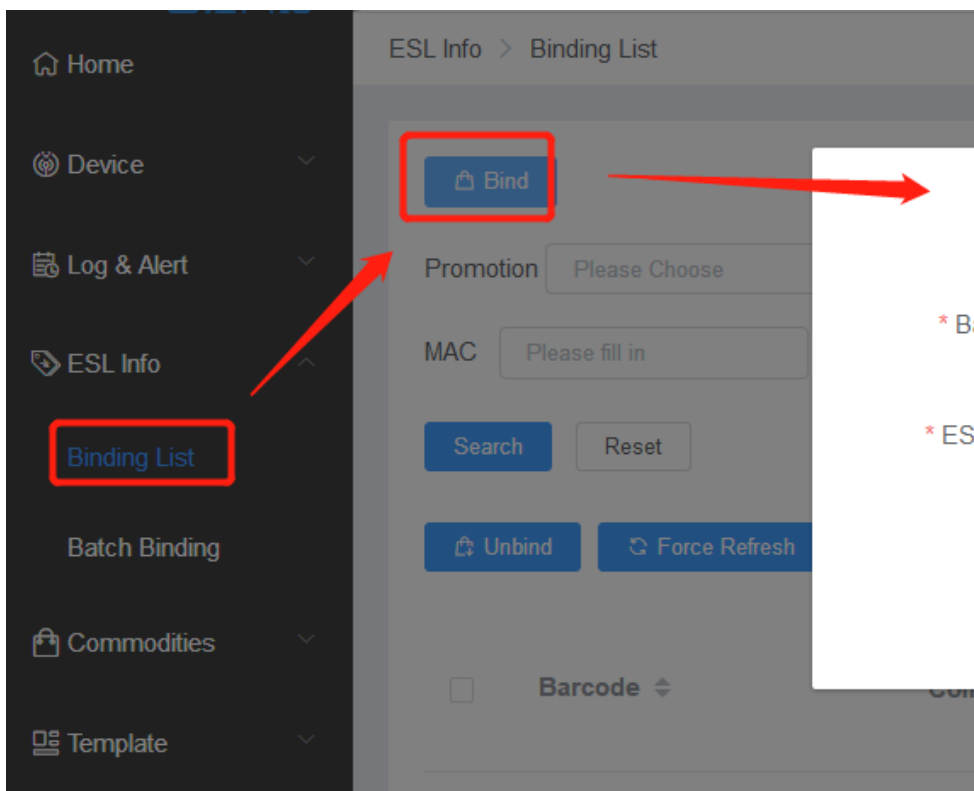

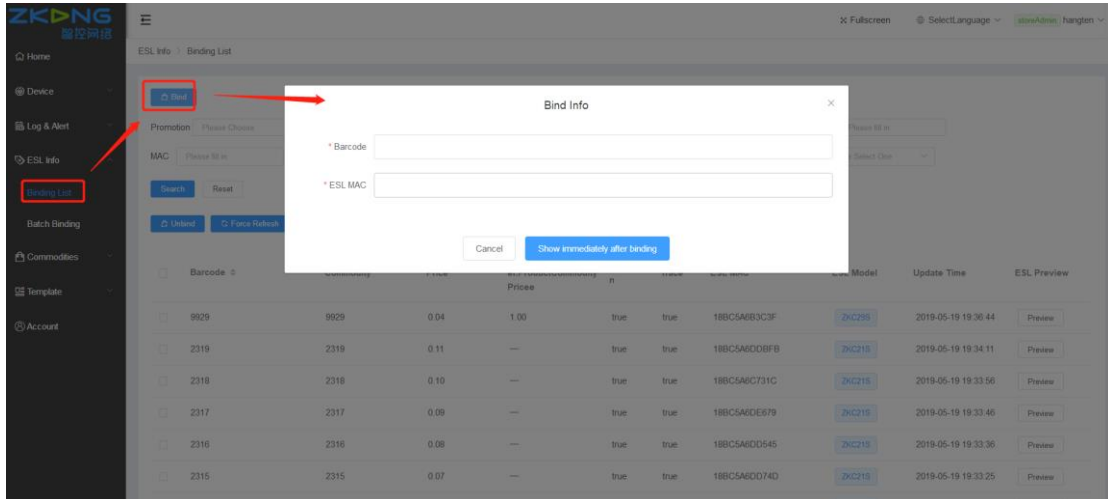

Done, click "Confirm" to check the AP state of the in the list.

7.ESL binding with the commodity

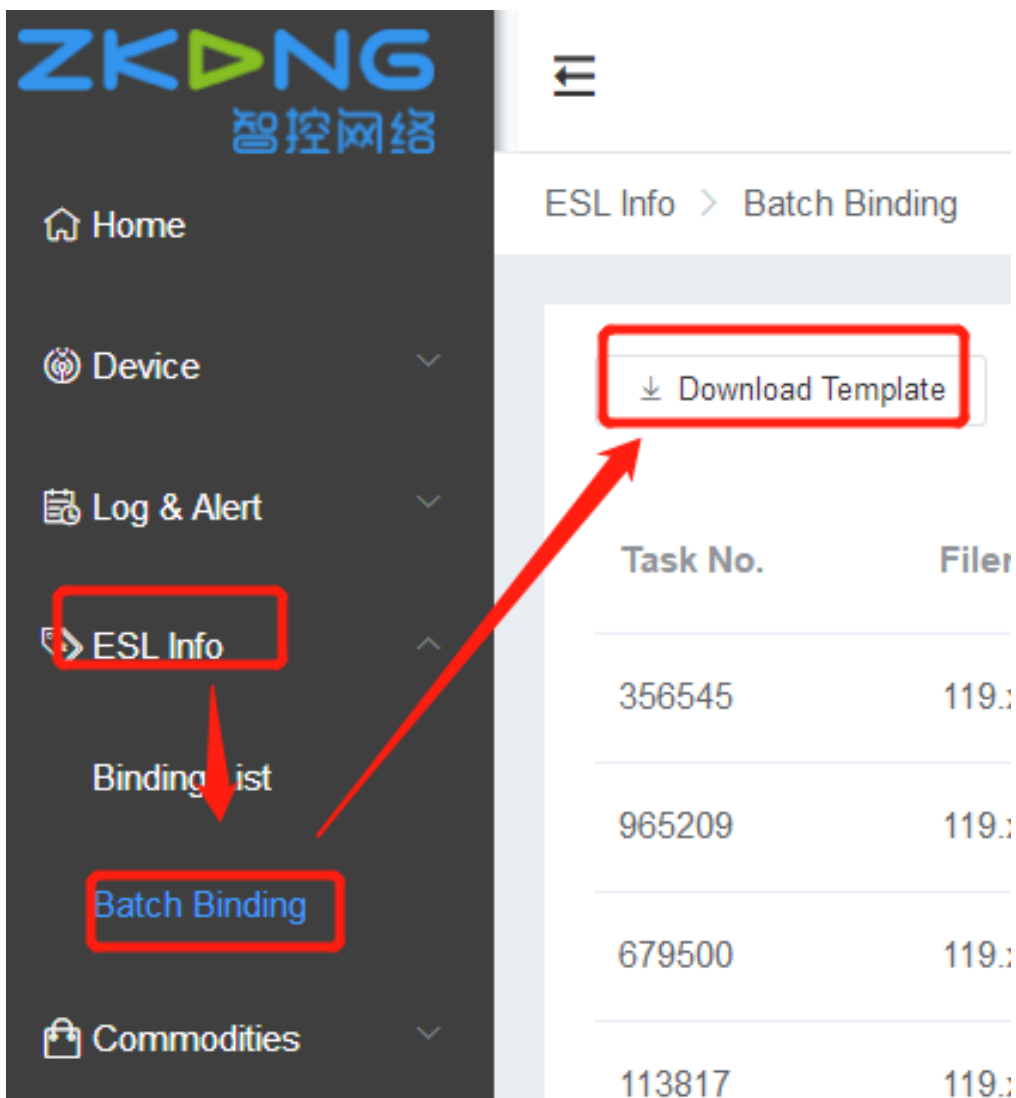

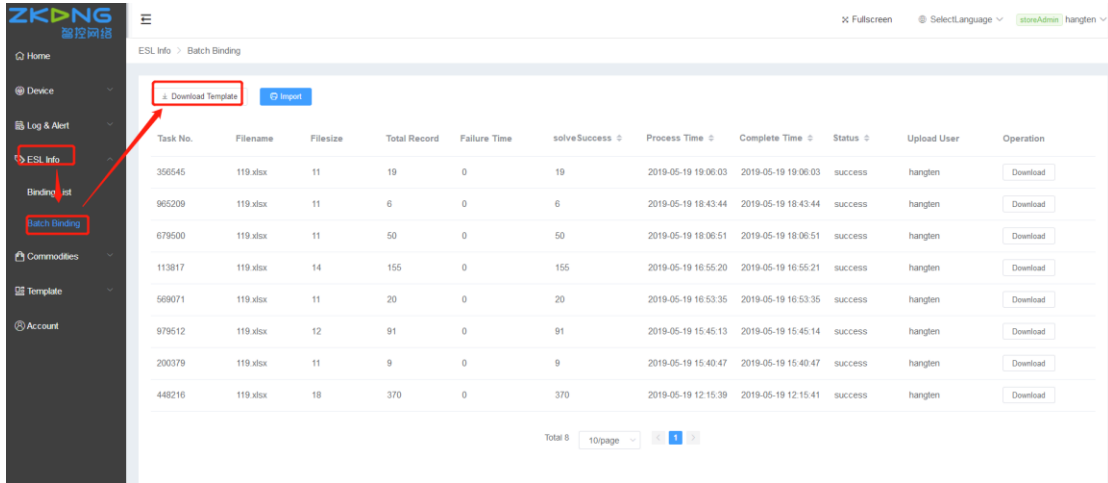

7.1 Single binding

Click "bind" on the page of "binding list" - "binding list", fill in the barcode of goods to be binding and the barcode of ESL in the popup of binding relationship, and click "show immediately after binding".

7.2 Batch binding

1、Download batch binding template. Click "ESL info" - "batch binding" - "download template ", download the template.

2、 Fill in the commodity barcode and ESL barcode in the template.

	A	B
1	esl barcode	commodity barcode
2	18BC5A6DE729	6948939610782
3		
4		
5		
6		
7		
8		
9		

3、 Import the template document of the filled information.

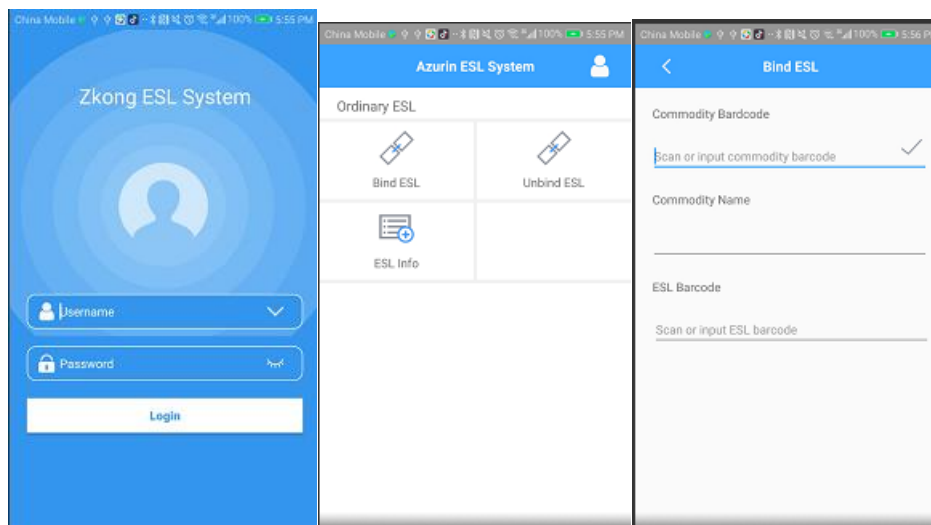

7.3 Using PDA binding

(1) turn on and connect to WiFi

PDA has a small power button on the top, long press for switch, short press for wake up scree. After wake up, PDA can be connected to the Internet, the same operation as the mobile phone.

(2) Use the APP

Open the "ESL" app in PDA, enter the user name and password of the store manager, and then click "bind ESL".

Press the yellow button in the middle of the PDA (no need of manual input of 69 codes), scan the 69 codes of the product firstly, showing the product name information, and then scan the black bar code of ESL (in the lower right corner of cover). PDA will show "submit successfully" and ESL will display product information automatically.

8.Modify product information

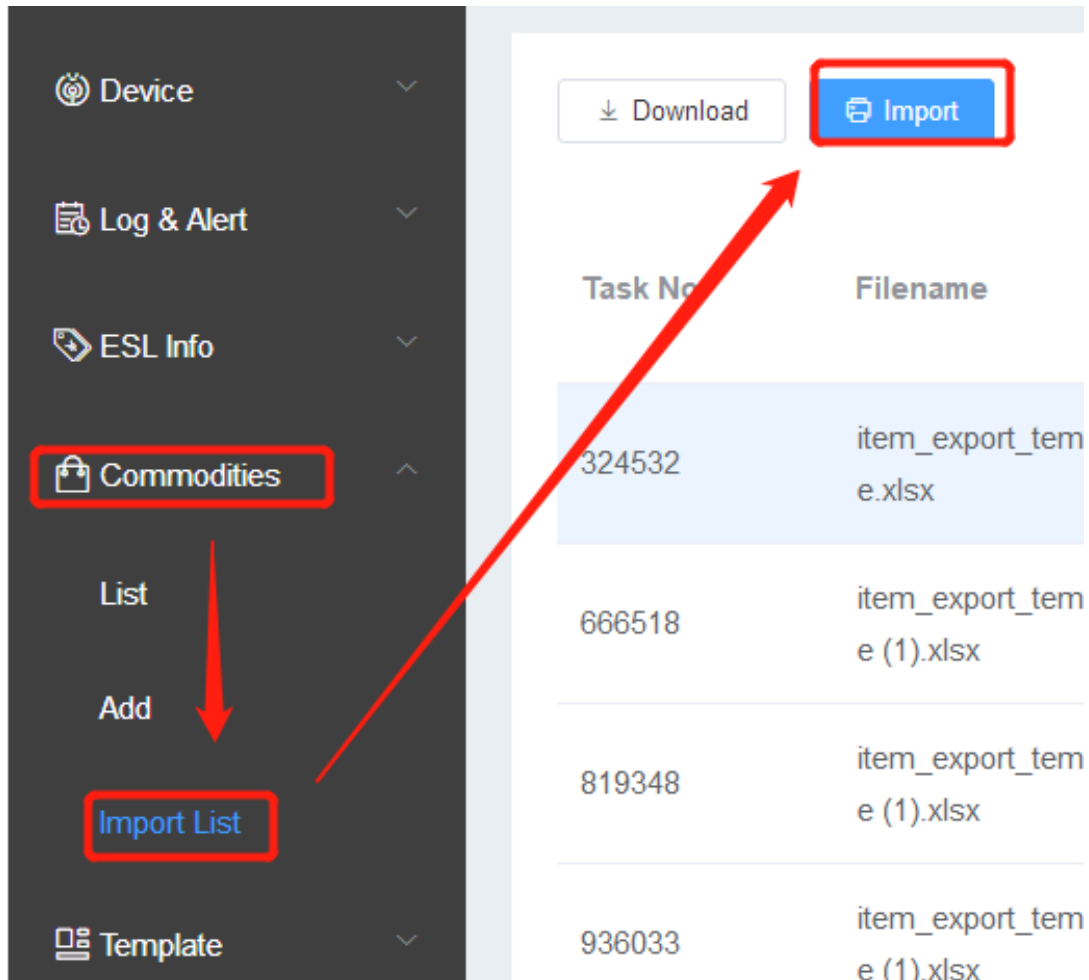

(1) Modify product information

Modify the information of the item in item_export_template, and save it after the modification
“Product barcode” cannot be modified. If modified, it will be a new product, which needs to be re-binding.

(2) Import item_export_template

1. Click "commodities" -- "import list" -- "import" -- "upload import file", select the item_export_template table that has been filled in, and click ok after uploading.
2. View the list page (refresh the page if there is no response within one minute). The first log shows successful processing to be uploaded successfully.
3. If the number of processing failures is more than 0, the error file can be downloaded and opened to check the error cause.

After successful uploading, the corresponding ESL will automatically change the display information

9.Regulatory information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
