**Overview**

This application is for a Biometric Access Control terminal, which has an ISO/IEC 14443 type Mifare contactless RFID reader. Model MA520 is used indoors, while model OMA520 is used outdoors. Both models are electrically identical and use the identical radio.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

**Recommendation**

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
