Tacoma, WA 98402

July 24, 2007

To whom it may concern,

We are submitting this application for certification of Sagem Morpho's MA520 Biometric Access Control terminal FCC ID: M9H-MA520. The radio is an ISO/IEC 14443 type Mifare contactless RFID reader. We are seeking certification under FCC 15-225. Please note, this certification will be used for the MA520 and the OMA520. Both devices utilize the same radio and are the same electrically. The MA520 is intended for indoor use and the OMA520 is intended for outdoor use.

The EUT utilizes a single antenna integral to the unit.

Your efforts in meeting all of the requirements to successfully apply for FCC and Industry Canada certifications are greatly appreciated.

Sincerely,

Scott De Witt
