---	--	---

1. OT208 / MYX-7A DIFFERENCES DESCRIPTION

1.1 GENERALITY

OT 208 is a derivative from MyX-7a (FCC ID: M9H95H03R3A).

Main hardware differences between OT208 and myX-7a are suppression of the camera and adding of a connector/switch antenna at the previous camera location. The shielding of the camera is kept in order to keep the radio frequency specifications.

1.2 PART LIST DIFFERENTIAL OT208/MYX-7A

Component removed:

Camera

Component added:

Switchable connector

Body (design) is different
