Dear Sir or Madam:

We, RF IDEas, Inc. hereby declare that the Wave ID products listed in the table below are electrically identical with the same electromagnetic emissions and electromagnetic compatibility characteristics as models RDR-7L11AKU and OEM-7L11AXU which were tested by Radiometrics Midwest Corporation, the results of which are featured in Radiometrics project: RP-9311. (Reference FCC ID: M9MLC7L11U2 & IC: 6571A-LC7L11U2).

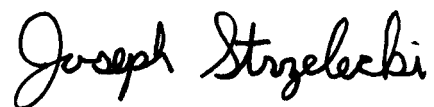

The following table is the product family list of the readers that use the same electronics and PCB as the ones tested in this report. The only changes are in firmware and non conductive housing that would not affect the EMC characteristics of the readers. The untested model numbers listed below are electrically identical with the same electromagnetic emissions and electromagnetic compatibility characteristics as those tested, therefore the tests on the model numbers below are representative for the tested models.

Model Number	Description
RDR-7L11AKU	WAVE ID Nano Keystroke LEGIC CSN Black Vertical USB Reader Tested Sample
OEM-7L11AXU	WAVE ID Keystroke LEGIC CSN OEM module USB reader Tested Sample
RDR-7L12AKU	WAVE ID Nano SDK LEGIC CSN Black Vertical USB Reader
RDR-7L12AKU-IMP	WAVE ID Nano SDK LEGIC CSN Imprivata Black Vertical USB Reader
RDR-7L11BKU	WAVE ID Nano Keystroke LEGIC Stamp Segment Black Vertical USB Reader
RDR-7L12BKU	WAVE ID Nano SDK LEGIC Stamp Segment Black Vertical USB Reader
OEM-7L12AXU	WAVE ID SDK LEGIC CSN OEM module USB reader

All above mentioned model numbers use the same frequency determining circuitry and use a USB-A interface. The 13.56 MHz transmitter circuits are identical on all models.

Please contact me should there be need for any additional clarification or information.

Best Regards,
Authorized Signature

A handwritten signature in black ink that reads "Joseph Strzelecki". The signature is written in a cursive style with a large, prominent 'J' and 'S'.
