November 20, 2007

RE: Mitac Technology Corp.

FCC ID: ISL_MAU025

I have a few comments on this application. Depending on your responses, kindly understand there may be additional comments.

1. Test report:

The RBW setting for measuring the radiated power at section 4.1.2 should not be less than the occupied bandwidth of the device. Please refer to occupied bandwidth at page 17 to 19, which are higher than RBW=1MHz.

Please check if voltage 19V on voltage variations testing is correct at page 31?

George Chen
Chief Technical Officer - Asia

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
