

TO WHOMSOEVER IT MAY CONCERN

This is to declare that the Physical Access Terminals manufactured by SCM Microsystems, Inc. with model names PAT1211 and PAT1221 use identical electronics. PAT1211 is a contact less card reader while PAT1221 is a contact less card reader with pin pad. The difference is only in the face plate of the enclosure between these two models. PAT1211 has a blank face plate while PAT1221 has a face plate that has the numeric pin pad.

Sincerely,

Calaimany Bhoopathi
Engineering Manager
SCM Microsystems, Inc.
