

## **Operational Description**

The EUT is a Wireless Module with a maximum data rate of up to 54Mbps utilizing OFDM technology. If the signal to noise ratio is too poor that 54Mbps cannot be supported, the 11Mbps data rate with CCK technique will be applied.

The transmitter of the EUT (Wireless Module) is powered by host equipment. The antenna type used in this product is Omni-Directional Antenna.

For detail instructions, please refer to user's manual.
