

Operational Description

This device is an 802.11b/g/n WLAN Module, which operates in the 2.4GHz frequency spectrum with throughput of up to 150Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 150Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by DC 3.3V \pm 10% from host equipment. The antennas are PCB Printed antennas without antenna connectors.

The other instruction, please have a look at the users manual.
