This is to justify, and certify that the transmitter output power (BT/BT4.0/802.11a/b/g/n) (please see the pages 2~4) are dropped in order to enhance the holistic performance while installing to the platform, Model: N15P1, platform: Tablet Computer, host owner: Acer Incorporated. Power at the originally tested default channel is set lower with professional installation under per-chain condition so as to counter the measurable influence on spurious emission near the restricted band of the frequency (\$15.205).

Applicant: HON HAI Precision Ind. Co., Ltd.

FCC IDENTIFIER: MCLT77H462

The Product Name of Radio Equipment: 802.11abgn+BT4.0 module

Platform: Tablet Computer

The owner of the platform: Acer Incorporated.

A handwritten signature in black ink that reads "Rio Chen".
