Notice\_content

-----

Question #1: The product description in the user manual does not agree the actual product tested. This product is a 802.11b WLAN with external USB interface. Please provide user manual that match with product.

Question #2: Section 1.4 of test configuration diagram, the EUT is placed inside the Notebook PC and the description below the diagram indicated the Compaq notebook was used. These description do not match the peripherals and host were used per setup photos. Please make necessary correction.

FYI: FCC no longer require Processing gain measurement for Digital Transmission System. In the future DTS submission, please do not provide processing gain data

Best Regards

Mike Kuo / TCB Certifier
