RE: Declaration of Compliance to RF Exposure Limits for Humans

Digi

## RF Exposure Statement

### 1. Standard Applicable

According to FCC 1.1307 (b)(1) and IC RSS-102, systems operating under the provisions of this section shall be operated in a manner that ensure that the public is not exposed to radio frequency energy level in excess of the Commission's guideline.

This is a mobile device operating in 2412-2462 MHz range at 42.15 mW.

### 2. Measurement Result:

MPE calculations

$$S = PG / 4\pi r^2$$

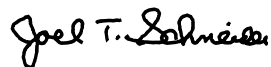

$$S = \text{power density} = .013 \text{ mw/cm}^2$$

$$P = \text{transmitter conducted power in milliwatts} = 42.15$$

$$G = \text{antenna numeric gain} = 1.58$$

$$R = \text{distance to radiation center in centimeters} = 20$$

This is less than general population/uncontrolled exposure guideline of 1 mW/cm<sup>2</sup>.
