

Spectrum Design Solutions  
110 North 5<sup>th</sup> Street  
Suite 400  
Minneapolis, MN 55403

July 26, 2012

To whom it may concern:

The model WDNV (FCC ID: MCQ-WDNV, IC ID: 1846A-WDNV) will be restricted from the end user in the following ways:

1. The product will NOT be sold to the end user, but to OEMs only.
2. The product will be installed by trained personal only.
3. None of the radio parameters of the device will be modified by the end user.

The device will be installed onto an aircraft by trained personal only. The FAA is regulating the device and the antennas that are being used.

The installer shall be responsible for ensuring that the proper antenna is employed so that the limits are not exceeded. The location of the unit in the aircraft will be access by only the trained personal for repair. The end user will not have access to the device for repair or modification.

The installer does not set any radio parameters of the device. The installer and end user will not have the software control when or after the unit is installed.

Sincerely,

Mike Burica  
Managing Director  
Spectrum Design Solutions
